

# Left Side Panel

This page provides information about the left hand-side panel of the user interface of Chaos Vantage.

## Overview

---

The left hand-side panel in Chaos Vantage has three tabs dedicated to camera settings, post-process settings and render settings for scene performance.

### Camera tab

Detailed information about the simulated real-world camera with equivalent parameters such as f-stop, shutter speed, lens focal length and more.

### Post tab

Detailed information about the render post-processing with exposure, hue & saturation, color balance, chromatic aberrations, LUT, Filmic tonemap, and Bloom controls.

### Render tab

Detailed information about the quick optimization controls for the rendering speed.
