

Uninstalling Phoenix FD

This page provides information on uninstalling Phoenix.

Overview

When installing Phoenix, the installer will automatically uninstall any previous versions by default. The following steps can be taken to manually uninstall Phoenix.

Windows

Before uninstalling Phoenix, make sure that Maya or Phoenix components are not being used. Then go to either of the following:

Start menu > Control Panel > Programs and Features > Phoenix FD for Maya 20xx for x64

Start menu > All Programs > Chaos Group > Phoenix FD for Maya 20xx for x64 > Uninstall Phoenix FD for Maya

This will start the Phoenix uninstaller. Follow the on-screen instructions to remove Phoenix from your system and restore any files overwritten by the installation.

Linux

To uninstall Phoenix for Maya, start with root permissions the **uninstall_chaos program**, which is normally located in the **/usr/ChaosGroup/PhoenixFD/MayaNNNN-x64/uninstall/** directory:

Example

```
$ su
$ /usr/ChaosGroup/PhoenixFD/Maya2023-x64/uninstall/uninstaller_chaos
follow the instructions of the uninstaller
$ exit
```

The uninstaller will not remove the V-Ray license configuration files or any other files that you have modified manually after the installation.

MacOS

To uninstall Phoenix for Maya double-click the **uninstaller.app** program, which is normally located in **/Applications/ChaosGroup/PhoenixFD/Maya20xx - x64/uninstall**

This will start the Phoenix uninstaller. Follow the on-screen instructions to remove Phoenix from your system and restore any files overwritten by the installation.
