

Liquid Authorization

This page provides information on the Authorization rollout for a LiquidSim object.

Overview

In case license information cannot be obtained, Phoenix will display this dialog to allow you to configure the license settings.

Phoenix provides two license types - [GUI and Simulation licenses](#), which are required for accessing the user interface of 3ds max and for simulating.

For more information, please refer to the [Licensing System help](#).

UI Path: ||Select Liquid Simulator object|| > **Modify panel** > **Authorization rollout**
