Installing V-Ray PLE for Maya

To complete the installation, follow the steps below.

1. You will be presented with the V-Ray licensing agreement. Please take a moment to review the agreement. Check the **I accept the Agreement** checkbox and click **Install** to proceed.

If you need to customize your V-Ray installation, press the **Advanced** button.

Welcome to V-Ray 6 for Maya 2020

PLEASE READ CAREFULLY. OUR PRODUCTS AND THE SERVICES AGREEMENT ARE DESIGNED FOR PROFESSIONAL BUSINESS CLIENTS AND CUSTOMERS. IF YOU ARE A BUSINESS CLIENT, PLEASE FIND YOUR CONSUMER AGREEMENT JUST BENEATH THIS LICENSE AND SERVICE AGREEMENT. ONLY THE TERMS OF SUCH CONSUMER END USER LICENSE AGREEMENT SHALL BE APPLICABLE TO YOU. OUR PRIVACY POLICY IS AVAILABLE HERE FOR YOUR CONVENIENCE JUST AFTER THE CONSUMER LICENSE AGREEMENT.

I accept the Agreement

Advanced

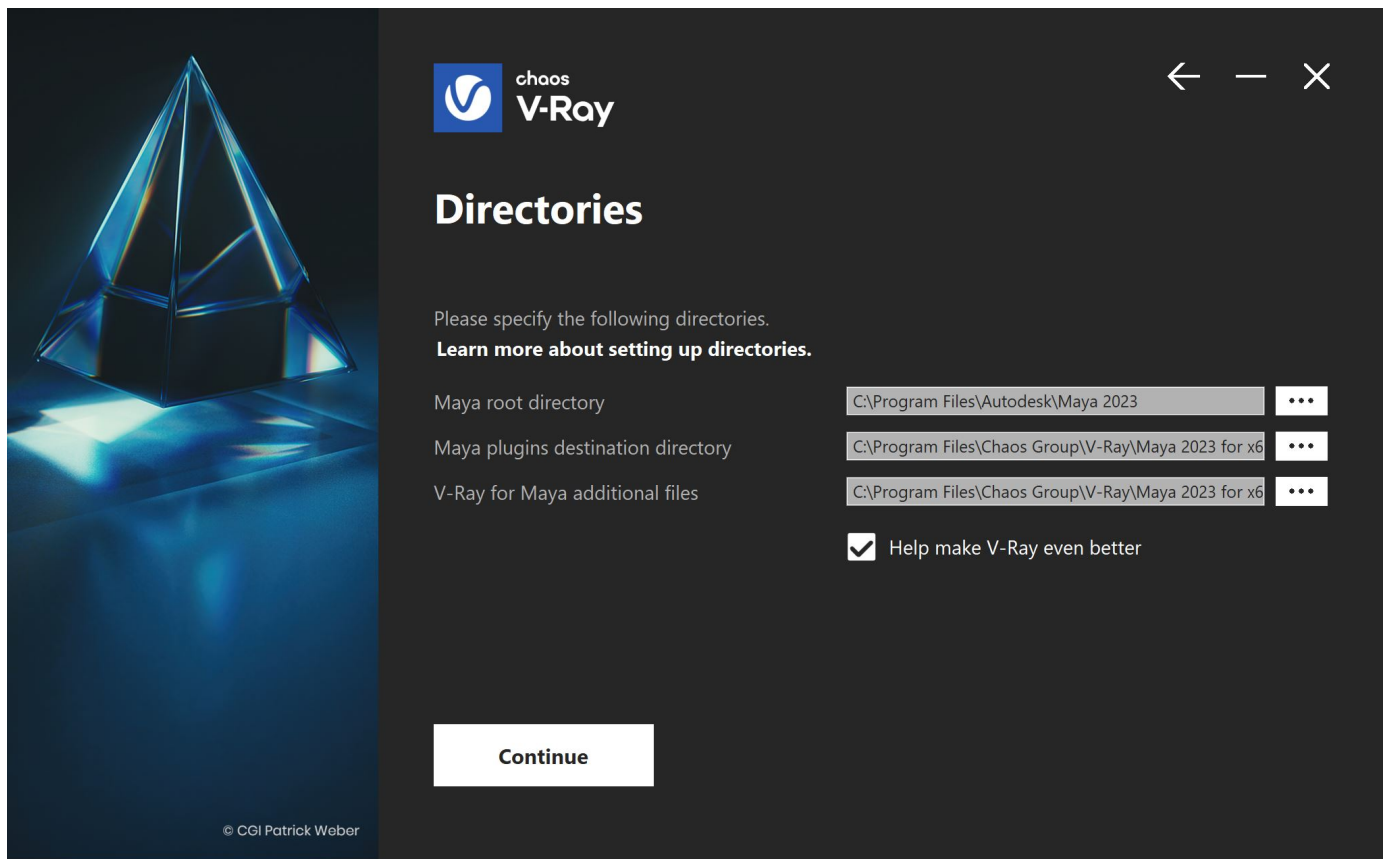

[Click here to see the Advanced installing options...](#)

Directories

Here you can specify the installation paths. Please check if the default folders are correct.

Download V-Ray material library – When this option is enabled, at the end of the V-Ray installation you also download the latest version of V-Ray Material library. For more information about V-Ray material library, see the [V-Ray Material Library Browser](#) page.

Help make V-Ray even better – Participate in the improvement decisions for future version of V-Ray. No intelligence property is violated when agreeing to participate in the feedback program. We do not gather scenes, assets, materials, etc. What we receive is user preferences on just a few key render settings and the resulting render times. The point of this feature is to improve V-Ray's performance and the user experience. This preference can be changed at any time later on from the **V-Ray Render Settings > Settings > About V-Ray > Feedback program settings**. For more information, see the [Chaos Telemetry](#) page.

Chaos License Server Options

At this step you can choose the license server directory.

Migrate data during installation – When enabled, transfers all of your settings made with older versions of the License Server, such as enabled dongle subsystem, proxy settings, etc. Disabling this option will install License Server with all settings at their defaults and any custom settings from the previous installation will be lost.

Add firewall exception – Enabling this option allows the default licensing port (TCP 30304) in the firewall. If you disable it at this step, you will need to manually add firewall exceptions later.

Chaos License Server Options

You choose to license locally therefore, the Chaos License Server will be installed.

License server directory

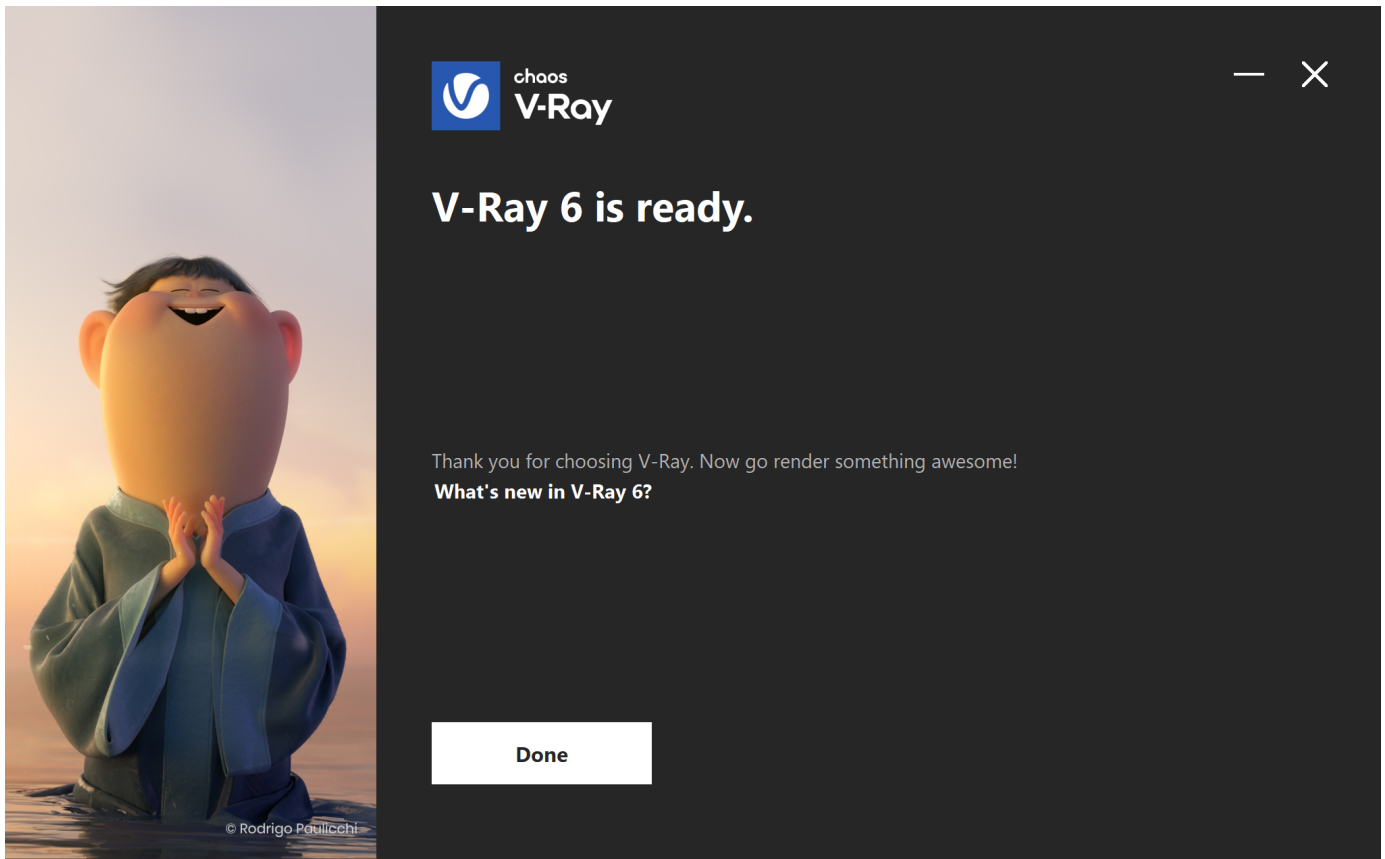

☐ Migrate data during installation

☒ Add firewall exception

Continue

2 After you click the **Install** button, the installer will proceed to uninstall any previous versions and install V-Ray on your machine.

If the installer detects any applications that need to be closed, they will be listed before being able to continue. Please close them and click **Continue**.

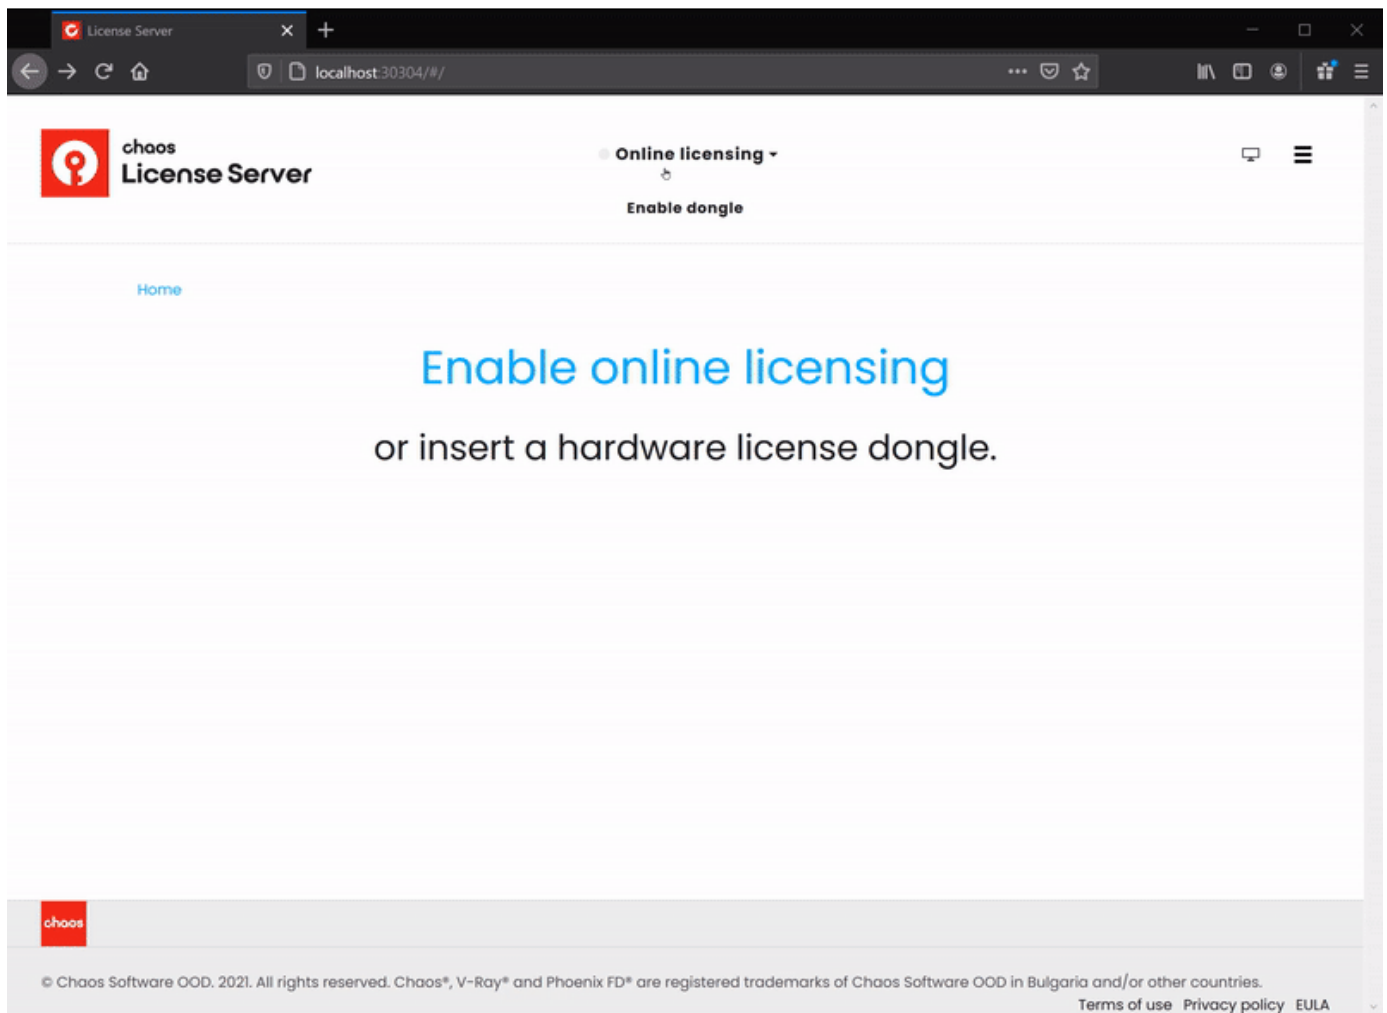

3. Now V-Ray 6 is ready to render!

Activate the License Server

To activate your V-Ray PLE for Maya license, you need to enable online licensing with your Chaos account.

Once the installation of the License Server is done, you are directed to the License Server local host ([127.0.0.1:30304](#)) in order to sign in and activate it.

Your License Server and V-Ray PLE for Maya license are now active.

The V-Ray PLE for Maya installer automatically installs the license server for you, but you can also [download](#) and [install](#) the Chaos License Server separately, if needed.
