

# Free Trial

This page provides information on obtaining access to the V-Ray Free Trial for Chaos products.

This page provides information on obtaining access to the V-Ray Free Trial for Chaos products.

## Overview

This guide provides instructions for activating the Free Trial offered by Chaos. Here are the steps:

You need to:

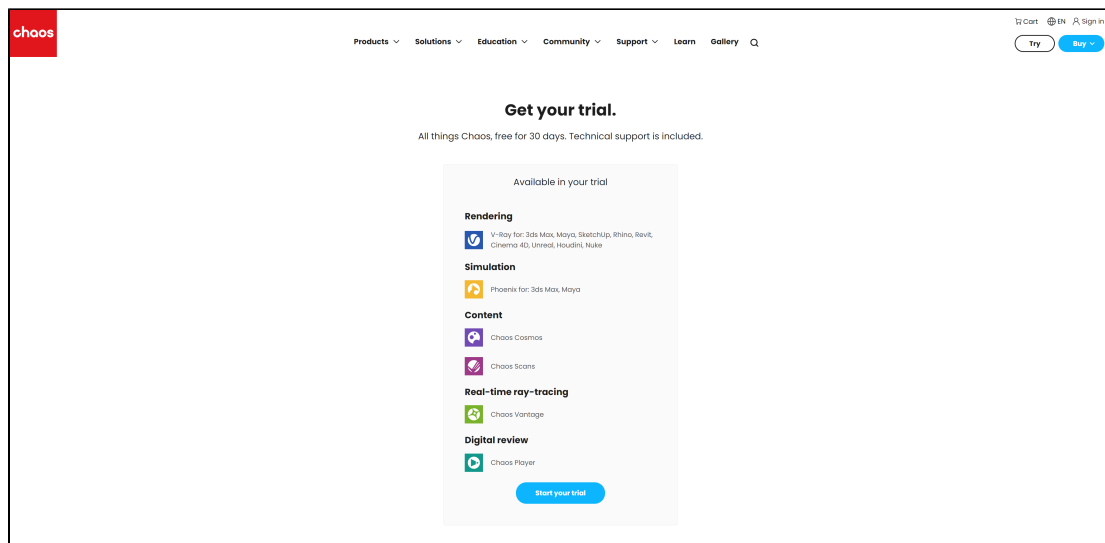

- Log in to your Chaos Account or create an account, if you don't have one.
- Register for the trial.
- Download and install the product.
- Activate the trial by signing in to the license server.

If you already have a commercial license, you are not eligible for the free trial.

## Access the Free Trial products

Go to the [Free Trial page](#), accessible on [www.chaos.com](http://www.chaos.com) by clicking **Try** in the upper right corner.

Select **Start your trial**.

This takes you to the Chaos login page.

If you already have an account, you sign in with your credentials.

If you do not have an account, [Create](#) and activate one, and then sign in.

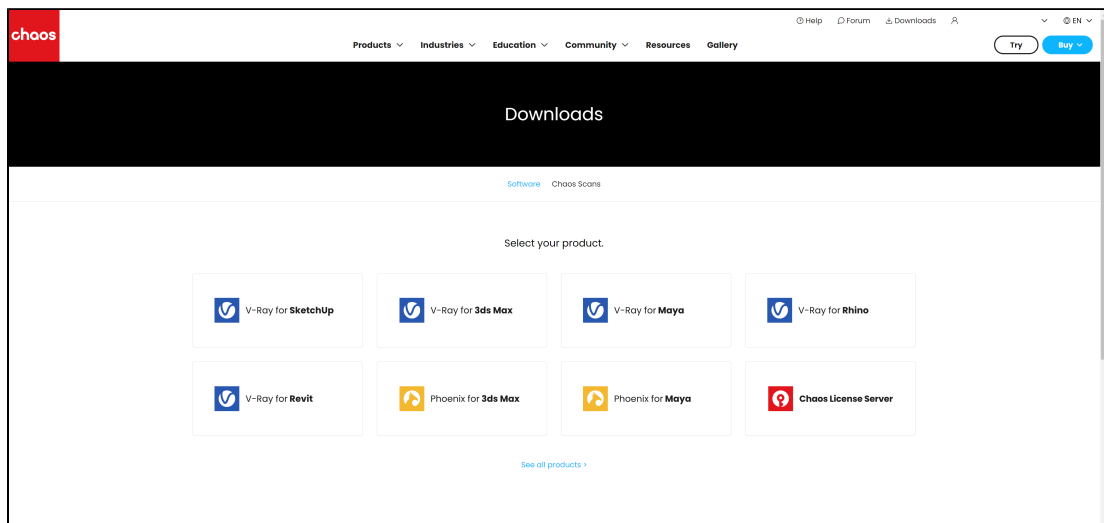

You are not eligible for a free trial, if you already hold a commercial license.

## Download a V-Ray Product Trial

After signing in, complete the registration form. Your Free Trial will be active for the **next 30 days**.

Follow the **Download trial** link at the end of the registration form to download your product(s) of choice.

Navigate to the product version that supports the host application version you use. Download and [install the product](#). If you need to try more than one product with your trial, repeat the download steps for all the products you'd like to try.

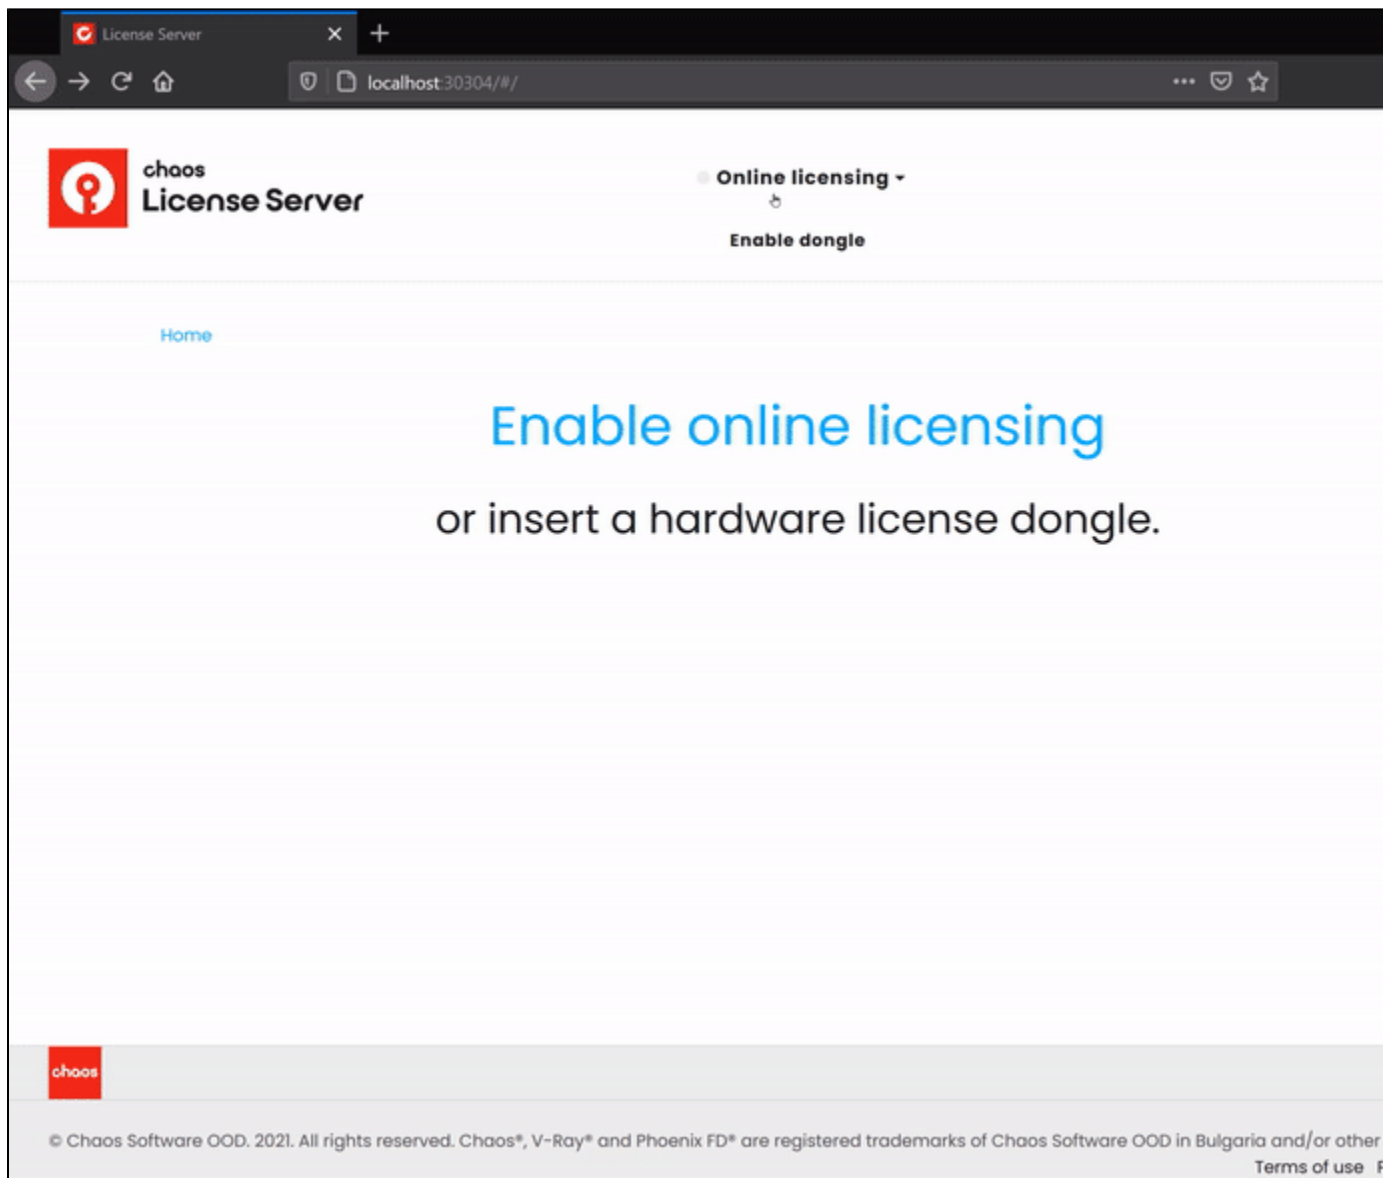

## Activate the Trial License

Finally, you need to sign in to the License Server.

After installation, the License Server webpage opens automatically.

Alternatively, you can open the **Manage Chaos License Server** app to bring up the interface or type [localhost:30304](#) in a browser.

From the **Online licensing** dropdown menu, select **Sign in** and enter your credentials. The login credentials are the same you use to log in to [chaos.com](#). Once you enter them, your Product Trial is available to you.

The License Server skips its installation process for two reasons:

- If it detects a previous installation of the Online License Server on your machine.
- If you choose the option **Remote V-Ray license server on the network**.

For full information on the License Server options and settings, see the [Licensing section](#) of the documentation.
