

# Convert V-Ray 3 Scene

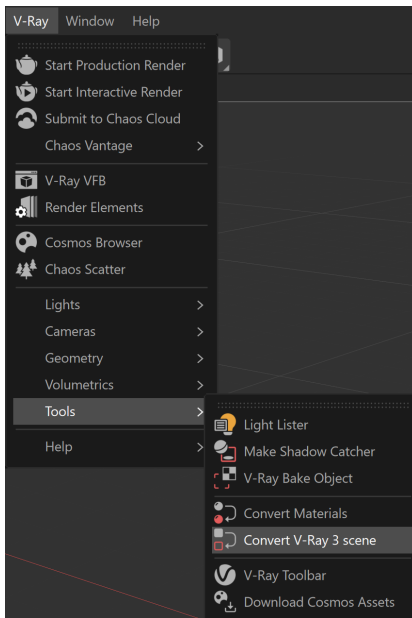

This page provides information about the Convert V-Ray 3 scene tool in V-Ray for Cinema 4D.

## Overview

---

The Convert V-Ray 3 scene tool allows you to convert old V-Ray scenes created with previous versions into functioning scenes with the latest V-Ray version.

By default, if you open a scene created with V-Ray 3, V-Ray will ask you how to handle the file. If you skip this prompt, you can find the same tool from **V-Ray > Tools > Convert V-Ray 3 scene**.

## Options

---

### Render Settings

**Replace existing V-Ray 3.7 with new defaults** – Replaces all options with the latest V-Ray default setup.

**Convert all compatible options** – Converts all old options that are compatible into the latest V-Ray options.

### Scene elements

**Convert all compatible options** – Converts all old elements that are compatible into the latest V-Ray options.

**Remove all V-Ray 3.7 scene elements** – Removes all old scene elements that are not compatible with the latest V-Ray version from the scene.
