

System Requirements

This page provides information on what hardware and operating systems are required for Chaos Vantage to work properly.

Requirements

Please make sure that your system meets the requirements listed below before installing Chaos Vantage.

RAM	System RAM should equal or exceed GPU memory (minimum 8GB RAM)
Operating system	Microsoft® Windows® 10 with Update 2004 (version 10.0.19041) or newer
Licensing	Vantage license with License Server 4.5.1 or newer
GPU Acceleration	DXR compatible NVIDIA® or AMD or Intel discrete GPU Chaos Vantage can use up to 2 GPU devices. For NVIDIA GPUs: RTX series or newer, required driver 515 or newer¹ in WDDM mode, recommended driver 537.13 or newer For AMD GPUs: RX 6000 series or newer For Intel GPUs: Intel Arc Alchemist or newer

Notes

1 – GPU must be set to **WDDM** mode and not in **TCC**, otherwise Chaos Vantage will not detect it.
