# Chaos Cloud Collaboration

Chaos Cloud Collaboration is currently in beta.

Chaos Cloud collaboration helps you share your work with your team and your clients. Simply invite them to review your images and share their feedback. This speeds up reviews, so you can get your projects done faster.

For more information and to start using it, visit https://www.chaos.com /cloud-collaboration.

Collaboration workflow

Upload images

Upload directly or share from the V-Ray Frame Buffer. You can upload multiple versions of the render.

Create a project

Organize your images in a folder.

Invite collaborators

Email an invite or share a direct link.

Get feedback

Review images. Pin comments. Resolve suggestions. You can use various annotations such as arrows, lines, etc.

Win approvals

Celebrate your success. Repeat!

Example: How to fast-forward design reviews in the cloud
